Town of Sylvan Lake

June 11, 2025

Consider yourself invited to check out the Sustainable Water Project page. Learn about your water supply and what we are doing to protect it. We appreciate the amazing Lakers learning about our water system and taking action to protect our water. Visit the Ask & Answered on the project page to ask questions. Let's talk! <https://loom.ly/Q6YVmZ0>

August 25, 2025 ·

Consider yourself invited! The Town is beginning to plan for two new major construction projects to improve traffic flow, enhance safety for all users, and plan for growth:

- > 50 Street and Memorial Trail roundabout planning
- > 50 Street redevelopment (Memorial Trail to Perry Drive) planning

Take the survey, come to the open house, or ask a question here:

Town of Sylvan Lake

May 15, 2024

Keep your toilet lids down from April 9 - June 30! Toilets may gurgle or splash. We are doing annual sewer line maintenance. This helps clear material that could cause sewer backups or blockages. Learn more here: <https://loom.ly/TIBV7W8>

## Town of Sylvan Lake's Post

**Town of Sylvan Lake**

November 7, 2022 ·

Here's the snow removal schedule for November 8:

- 48 Avenue, from 50 Street to 51 Street
- 47A Avenue, from 50 Street to 51 Street
- Perry Drive
- Crestview Blvd
- Sylvan Drive
- 50 Street: West side only
- Falcon Ridge Drive
- 53 Street, north of the tracks
- Wildrose Drive

We thank Lakers for their patience around the snow plows!

Town of Sylvan Lake

April 7, 2025 ·

Street sweeping starts on April 8 if the rain holds off. 🤙 Check the sweeping schedules here: [https://loom.ly/B5\\_8kMo](https://loom.ly/B5_8kMo). Schedules may change as street sweeping depends on the weather. ☁️☁️ Why? A little rain, or dampness keeps the dust down. Too much water makes mud that smears and won't pick up.

Boil Water Advisory Update | Saturday April 17, 2021

Update 3:40 PM | The Town is waiting on lab results from AHS water safety testing. Until results are received, the boil water advisory is still in effect (south of 48 Avenue and west of 50 Street).

\*\*\*\*

Good morning.

A mandatory boil water advisory is still in effect (south of 48 Avenue and west of 50 Street) until further notice.

What do I do?

While you still must follow the boil water advisory, you only need to run your taps for 10-15 minutes if you have discolouration. If that does not clear the discolouration, please call 403 887 2800

Follow the boil water advisory fact sheet from AHS: <https://bit.ly/3sizrXT>

### How to Use Water at Home During a Boil Water Advisory

#### Drinking water and preparing food

- » Don't use tap water for drinking, preparing food, making juices, and vegetables, making rice, or preparing infant formula.
- » Throw away any ice, filtered water, drinks, or food made with contaminated water.
- » Don't use a home water filter to try to make your water safe. Home water filters are not able to safely treat contaminated water.
- » Don't give your pets tap water to drink.
- » Don't use tap water for a pod-style coffee maker. A regular drip coffee maker tends to be safe to use as the water reaches a high enough temperature.

#### How to make your water safe to drink

- » Bring your water to a rolling boil for at least 1 minute before drinking and preparing food.
- » Store boiled water in a clean and covered container in the fridge after letting it cool.
- » Cleaning and dishwashing

#### You can use tap water

- » For laundry and cleaning surfaces that don't come in contact with food, such as walls or floors.
- » In a dishwasher using either high heat setting or the sanitize cycle.

#### Sanitizing surfaces and dishes

Sanitize surfaces that come in contact with food

#### Taking care of your body

- » Don't use tap water to brush your teeth - use bottled water or boiled water instead.
- » Don't use tap water to fill a wading pool, play areas, or water playtables.
- » You can use tap water to shower and bathe. Watch small children to make sure they don't drink the water.
- » You can use tap water for handwashing. Always use a hand sanitizer with at least 60% alcohol after you wash your hands with soap and tap water.

#### After the boil water advisory ends

- » Turn on all taps and flush water lines for at least 5 minutes (10 minutes if you live in an apartment building).
- » Read instructions from the manufacturer for how to flush, clean, and sanitize containers that protect and store drinking water (called cisterns), water filters, and ice and water dispensers.
- » Drain and refill hot water tanks that are set below 45° C.
- » Run water softeners through a regeneration cycle (see the instructions from the manufacturer).

Please visit this AHS boil water water advisory fact sheet at:

GROSS! 🤢 This is a clog from Sylvan's sewer system. It's made of unflushables. They are expensive to fix and cause sewer backups. Even if a package says flushable, it's not. Don't flush anything except poo, pee, or toilet paper. Learn more: <https://loom.ly/Ky4IYIE>

Are we to assume none of that is from grass clippings, twigs or garbage that flows into the system?

Hey Lakers! Pay parking starts today, May 15. 🚗 The only change for 2025 is extended pay parking areas along 50 Avenue.

If you haven't already, please register now.

Already registered with no changes? You are good to go unless you have new plates, which must be registered to qualify for free parking.

Learn how and get help here: <https://loom.ly/ku2GiJc>

Our water comes from wells fed by mountain runoff. Glaciers, snowpack, snow, rain, sleet and hail fill aquifers with water. Our wells draw water out of those aquifers. Since we don't control precipitation, we have no direct control over how much water ends up in our wells. Check out ways to save water here: <https://loom.ly/JyeBFYU>
