

Video Scripts For Pay Per Click Pages

Main Page

Hello and welcome to Clear Haven Center. We know you are looking for an affordable rehab solution that can offer success. Clear Haven's holistic program not only includes regular counselling sessions, but provides education to teach the problem solving skills needed to prevent relapse.

Each client is assisted to create their own unique and well-defined relapse prevention plan. They will come away with the tools needed to master everyday situations that can lead to slips. We also have an aftercare program to provide support when it is needed most.

You can start learning how to beat addiction today! Please call 1-877-465-8080 or click on the brochure button at the bottom of the page to find out more.

28 Day Treatment Programs B

Hello and welcome to Clear Haven Center. We know you are looking for an answer to addiction problems and how to prevent relapse. Current addictions field research proves that the longer a person is abstinent, the less likely they are to relapse, and if they do relapse the length of relapse is shorter.

That is why you can attend Clear Haven's program for 60 or 90 days. The longer you stay, the greater your chances for success. Please call 1-877-465-8080 or click on the brochure button at the bottom of the page to find out more.

Why 12-Step Doesn't Work B

Hello and welcome to Clear Haven Center. We know you are looking for an affordable rehab solution that can offer success. 12-step programs teach that members will need to attend meetings for the rest of their lives. 12-step programs use one solution for every type of addiction problem, and do not consider individual needs.

Clear Haven Center uses a holistic approach that is based on techniques proven by research. Our program uses a flexible approach for each individual. A person with the experience of addiction can leave addiction behind and have success in all areas of their lives. Please call 1-877-465-8080 or click on the brochure button at the bottom of the page to find out more.
